

# Capabilities

TransSIGHT (DBE/SBE) is a leader in technology development, integration, operations, and program management that includes major user system projects. Incepted in 2014, our leadership team brings over 150 years of collective experience working on transportation and consulting projects, including more than 80 solutions and services delivered to government organizations worldwide. Our philosophy is to provide proactive support and on-time/in-budget project delivery while maintaining the highest service/solution quality.

We leverage extensive staff experience implementing and operating data-driven, user-centric solutions. TransSIGHT delivers directly to transit agencies and partners with other organizations to combine and enhance offerings to clients.

TransSIGHT is an expert in the transportation domain with focused expertise in the areas of automated fare collection, data, operational data, schedules, route maps, service alerts, multi-modal trip planner, and real-time arrivals and departures. TransSIGHT has more than 13 years of experience working with transportation agencies on such projects as Clipper, HOLO, BART MaaS, CCTA Mobility on Demand, SF Bay Area 511, BART.gov, BART Mobile App, SamTrans Mobile Ticketing, Vital Signs, WMATA, New Orleans NORTA and SamTrans and Caltrain Business Intelligence solution.
